Agricultural support will continue to be seen on Kansas roads

Manhattan, Kan. – Agriculture is the number one industry in Kansas, therefore covering a majority of the landscape. For many outsiders the State of Kansas may be just another long drive between Colorado and Missouri. Yet for those that reside and make their living here, Kansas becomes a unique area with many things to offers those that take the time to enjoy it.

The Kansas Foundation for Agriculture in the Classroom (KFAC) is trying to spread appreciation of our state and agriculture by providing quality educational resources to Kansas educators and students. It is KFAC's mission to connect Kansas classrooms to agriculture.

Recently, a popular fundraiser for the organization was in danger of being discontinued, however KFAC is proud to announce that the Agri-Tag specialty license plate fundraiser will continue to be available in County Treasurer's offices across the state. In 2005 the state of Kansas set a minimum requirement for the number of specialty license plants on Kansas roads. KFAC received an enormous wave of support from the agriculture community to assist in saving the Agri-Tag, said Stephanie Hatfield, KFAC Marketing Director. "We are reassured that the Kansas agriculture community is truly a wonderful group of individuals and organizations that unite when one is in need of assistance," Hatfield said.

KFAC will continue to provide Agri-Tags for a \$25 donation to the Foundation. An Agri-Tag brochure is available through our website at [www.ksagclassroom.org](http://www.ksagclassroom.org) or by phone toll free 1-866-759-8031. The funds from the Agri-Tag allow KFAC to continue to provide Kansas with quality educational resources and services.
